DATA STEWARD

Work description

- Support for researchers/students in the field of data management, data storage, data sharing, and Fair data principles
- Develop and implement data management plans for projects and data collections and align Data Management Plans (DMP) with the FAIR (Findable, Accessible, Interoperable, Reusable) data principles and the principles of Open Science
- Advise projects and data collection on compliance with regulations and field-specific legal and ethical standards
- Provide adequate research data management (RDM) support to researchers. This involves, for example, supporting researchers in improving the reproducibility of their computational analyses or directing researchers to appropriate data management and archival solutions
- Monitor a project's needs regarding data-infrastructure and tools for RDM
- Determine the adequate level of knowledge and skills of researchers on RDM
- Identify the requirements of adequate support and data infrastructure for FAIR and long-term archiving of data of a project
- Educate the researcher in the area of FAIR data and Open Science

Requirements

- Minimal Bc. in a technical field (biological field with a willingness to develop technical skills)
- Good knowledge of the English language
- Communicativeness, team working
- Knowledge of data management is advantageous
- Driving licence

We offer

- Training in data steward-related skills
- Work on interesting international projects in an experienced and motivated team;
- The calm working environment of Novohradské hory
- Employee benefits ((5 weeks of vacation, four days of sick leave, discounted mobile calls or banking services at a partner bank, free MS Office for private use, allowance for meals);
- Possibility of personal and professional development

Start: 2023

Contract: Full time

Working place: Faculty of Fisheries and Protection of Waters, Vodňany, České Budějovice, Nové Hradky
