Are you passionate about doing meaningful work? Do you care about water as one of our most important resources?

The Water Security Agency is seeking a Senior Project Engineer to join our Owners Engineering team.

This position will provide professional engineering services and support to a broad range of activities directly related to the investigation, design, construction, and rehabilitation of water resource management and/or infrastructure management projects. This employee will be responsible for undertaking routine to moderately complex projects or assignments.

The successful candidate will demonstrate the ability to manage and deliver water management projects of moderate size and complexity by collaborating effectively with internal teams, engineering consultants, regulators, landowners, and other stakeholders. You will take a proactive approach to planning and decision-making, leading the development of budgets, schedules, and forecasts while ensuring projects meet technical, regulatory, and environmental requirements.

The role requires strong judgment and attention to detail in preparing and reviewing engineering documentation,

tender and construction materials, and in administering construction contracts. The candidate will also provide hands-on support during construction, ensuring work is carried out safely, efficiently, and in accordance with approved designs, best management practices, and regulatory approvals.

The successful candidate will have a Degree in Civil Engineering or a similar engineering discipline, a licence to practice professional engineering from the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS). Applicants with the required education will be assessed to determine their level based on relevant experience.

This role is subject to a satisfactory criminal record check.

We offer rewarding career opportunities, competitive salaries, and a comprehensive benefits package.
